

Check out this year's environmentally themed weeks

Flipper and Friends

This week campers will learn all about dolphins! Dolphin classification, body function, senses, and conservation will be discussed. Campers will learn in detail about the three types of dolphins we have at Miami Seaquarium. Dolphin training techniques and husbandry will also be explored.

Oceans in Motion

This week campers will learn about the world's oceans. Campers will discover why waves, tides, currents and ocean landscape are important to marine animals and to our planet. Ocean conservation topics will also be explored during this week of camp!

Every week includes an opportunity to see each of our marine mammal shows and a daily animal interaction.

(Weather and park schedule permitting)

Ocean Rangers

Campers will learn about some unique habitats of Florida and how to conserve these habitats. Coral reefs, mangroves, sea grasses, beaches, and the Everglades will be explored this week. Campers will also learn about the plants and animals that make their homes in these special habitats.
